

The  
**MOST ADVANCED  
Flash Drive Ever Built**

**Kingston Data Traveler 5000—Secured by SPYRUS™**  
The first in a line of the most secure commercial USB  
flash drives in the world.

- What Secured by SPYRUS™ means to you
  - Epoxy-sealed module protects memory and security components
  - Anti-tamper mechanisms with built-in self-destruct features
  - Ten incorrect passwords forces re-initialization of the device
  - Password transmitted to drive via secure channel
  - Password is authenticated with epoxy module, then discarded
  - No passwords are stored anywhere—period
  - No use of simplistic challenge-response protocols
  - No admin rights required for installation or use
- Hardware-based XTS-AES 256-bit encryption
- FIPS 140-2 Level 2 validated with Level 3 validation pending
- Designed and developed in the U.S.A.
